

FEEL LIKE YOUR VALVES NEED SOME PUMPIN'?

AXIOM KOMPRESS AIR PRO CARBON

This is one of those pumps that causes all the kids in the hall to go "Wow" when they come close to it. Why is that you ask? Well let's see, first it's carbon and looks real fancy, second it "plugs" right on any valve whether Presta or Schraeder and pumps like a mo-fo without any whining or screaming. Some highlights include: nickel-plated base, lever and cap, 70mm diameter oversized gauge, Adapt-Air Plus head with bleed valve, and a 120cm hose length. With more leverage than Monica Lewinsky and a better handle than the "Bandit", the Kompress should work just fine under any circumstance and look even better next to your 42-inch flat screen, black leather couch and lineup of bikes in your garage.

Color: Carbon and Nickel dawg!

Sizes: Monster Floor

Price: \$120
